

## summary

IST has introduced me to quite a few languages and technologies. Outside of university I've developed two personal websites and took part in a summer internship at Talkdesk.

I have a professional background in pastry and in restaurant management, both were the result of a degree I took in hospitality in the Food & Beverages fields. I've recently finished my Bachelor's in Computer Science and Engineering and I'm undergoing the Master's specializing in distributed systems and software security.
